

WILSON HAS LET DOWN BRITAIN

J. U. Ezechi

Aba

NEVER in the History of England has that Country been disgraced as now. Britain stinks to many people; a British no more walks with his head high. The Economy of Britain is unstable, her reputation is at the lowest ebb as demonstrations mount every week in all world capitals against her. Indeed the word Britain to so many people is a curse.

The State of England at the present time is caused by her Prime Minister - Harold Wilson. Harold Wilson is ruling England just as Philip IV of Spain. He is a man who has no love for his Country; who has no sense of justice, and who has let down the once famous Britain.

For years to come, future generations in Britain will sigh any time his name is mentioned. Wilson has failed the British people both at home and abroad.

He has dragged Her Majesty's government to supporting that Shaw-shaw boy Gowon in his war of genocide against our young Republic. Today that government encourages genocide. Wilson's hand is full

of the blood of the innocents. By teaming up with Godless Russia, Wilson has failed in International Politics.

Before Labour Government came to power, Britain was facing some Economic problems. It was the hope of the English people that the Labour Government would rescue this tottering country from collapse. This hope was dashed to the ground by the unpopular policies of the Wilson government. Today, the Labour party has lost her prestige and popularity.

To the British people, Labour Government has failed and should never again in an election come to power. Shame.
