

ARE THEY REALLY MAD ?

Chinyere Oleru

Aba

PLEASE allow me a space in your daily journal to air my view on the influx of mad men in our townships. Recently I observed that there are many mad men in Aba and in other big townships in the e-public. That gives doubt as to whether all of them are really mad.

Although mad men dress in unpleasant dresses, but recently the way some of them dress does not give one the impression that they are really mad. I suggest that the time has come when they should be provided with a common place so that they should not give way to the infiltrators to come in disguise and spy on us.
