

KILL THE VANDALS FROM A DISTANCE

R. N. Ohi

OBI A

I wish to express my gratitude to our gallant Biafran forces and to implore them to understand that the God of Biafra is great and as such victory shall be ours.

The Bunker dweller Yakubu Gowon has come to realise that his boast of crushing Biafra in 48 hours and his so called specials have become the biggest joke of the year as it is the episode of the year.

Gowon has also come to realise that he is fighting a war of aggression against the peace loving people of Biafra and

now a war of disease has spread amongst the barbaric Nigerian hordes.

The spread of meningitis is a devastating significant effect of the type of punishment awaiting the Hausa/Fulani gangsters who committed the atrocious act of 1966 to the innocent Biafran in the North

Because of this spread of disease I appeal to our gallant forces to fire and kill the vandals at long range. Don't capture them prisoners again for otherwise they will spread their meningitis in our healthy kingdom.
